

Do you support residents with eating and drinking?

I would like to hear about your experiences!

You are invited to take part in a short anonymous survey about your experiences of supporting residents with eating and drinking, particularly when following Speech and Language Therapy (SLT) recommendations.

The survey aims to understand what helps staff in their day-to-day work, what challenges they experience, and how SLTs can better support care homes.

Who can take part?

- All care home, nursing home or residential home staff who support residents with eating and drinking

What's involved?

- A short online survey
- Takes 10-15 minutes
- Questions about your experiences
- Anonymous and voluntary

Why take part?

Taking part gives you the opportunity to share your experiences. Your responses may help improve training and support for care staff, and improve care for residents with swallowing needs.

This survey is part of a MSc Speech and Language Therapy dissertation and has been granted ethical approval by Birmingham City University
